Key Insights

- **Gender Gap:** Women make up **32%** of all customers, but **0% of the loyalty program**. This shows the club currently fails to attract female shoppers.
- **Discount Focus:** Every single club member (**100%**) uses promo codes. This means customers are **joining for the discounts**, not necessarily because they are loyal to the brand.
- **Main Customer Group:** The business relies mostly on people aged **41-60**. They are the most stable and important group for our sales.
